

Story Problems - Have your child pick 5 or more stories to solve.

Have your child draw a picture to show the story (the picture needs to show the solution, it does not have to be a great artistic masterpiece) for example the first story could just be 5 small circles and 5 large circles. Draw a number bond and a number sentence too. Post 1 on See Saw so I can try and guess whose problem you solved. Have fun.

**Kamdyn** had 5 small marbles. His friend **Averie** gave him 5 big marbles to add to his collection. How many marbles does **Kamdyn** have now?

**Avery B.** had 4 cookies. She shared 2 with her friend **Derek**. How many cookies does **Avery B.** have left?

**Clark** found 3 ladybugs and put them in his bug catcher, His friend **Mason** found 10 ants and added them to the bug catcher. How many bugs do **Clark** and **Mason** have?

**Derek** stacked 10 blocks in a tower. His friend **Harry** stacked 10 more on top. How tall is their tower?

**Harry** had 8 pieces of candy. He gave his friend **Colton** 4 of his pieces. How many pieces does **Harry** have left?

**Averie H.** was playing Shark Attack with her friends. She had 10 cards in her pile. **Audrey** picked the tentacle swipe card and took 1 of **Averie H's** cards. How many cards does **Averie H.** have now?

**Morgan** and **Kamryn** were drawing a picture together at the art table. **Morgan** grabbed 10 colored pencils to draw with and **Kamryn** grabbed 6 more colored pencils for the picture. How many colored pencils do **Morgan** and **Kamryn** have all together?

**Ashlyn** picked out 3 books to read. Her friend **Isabella** also picked 3 books. They sat down to read together. How many books do they have all together?

**Kamryn** and Harper were making flowers at the art table. Kamryn made 7 red flowers and glued them onto a piece of paper. Harper made 3 blue flowers and glued them onto the same piece paper. How many flowers are on the piece of paper?

**Audrey** had 12 markers at the art table. Her friend Mason asked if he could use 2 of her markers. Audrey said yes, and shared 2 markers with Mason. How many markers does Audrey have left?

**Mason** was building with legos. He clicked 10 together to start his creation. Clark came over and gave him 7 more for his creation. How many legos does Mason have now?

**Colton** and Harry built a building with blocks. Colton added 8 bears to the building. Harry added 10 more bears. How many bears are on their building?

**Maeve** and Isabella were helping Mrs. Jakiel hand out agendas at the end of the day. Maeve took a stack of 5 agendas and passed them out. Isabella took a stack of 4 agendas and passed them out. How many agendas did the girls pass out?

**Harper** and Ashlyn made 18 hearts at the art table. When they were done they gave 8 hearts to Mrs Jakiel. How many hearts do Harper and Ashlyn have left?

**Isabella** and Averie H were playing roll the word. Isabella rolled the word "the" 3 times. Averie H rolled the word "the" 2 times. How many times did the girls roll the word "the"?

**Mrs. Jakiel** was marking agendas at the end of the day. All 15 kids were on Confetti. Mrs Jakiel filled out 5 confetti cards. How many more does she have to fill out?
