## GREAT THINGS HAPPEN IN OUR SCHOOLS!

Senior Casey Taylor

### Another Splash for Casey Taylor ...

**Takes 1st in 50 free  
& 100 free  
at ECIC meet**

Lake Shore Eagles swimmer Casey Taylor has made yet another splash, taking 1st place in the 50 free and 100 free at an ECIC meet

just days after an Alden meet that saw him toppling the Lake Shore school record in the 50 free set by Derek Smith in 1995.

Casey also was named the swimmer of the meet by the ECIC officials!

Casey, a senior, is captain of the Lake Shore swim team.

### Where Were You on Conference Day?

No doubt you were learning or planning or analyzing something, no matter where you were!

[Here's a look](#) at the activities and action

on Jan. 28. The next Superintendent's Conference Day is on March 18.

*At right: Transportation staff in training session on safety, de-escalation techniques and empathic listening.*

### Inquiring Minds Ask: Are Those Magic Potions Real?

Why do some things explode? Are magic potions real? Just ask the 5<sup>th</sup> graders at A.J. Schmidt – they have been studying gases, particle models, acids, reactions, properties of matter, chemistry and conservation of matter.

Having some fun during one of their experiences are Mrs. Gawlik's young

scientists, at right.. Mrs. Wunder's students had a blast using different simple things found around the school and home to see chemical reactions.

Students of Kristina Lewis took their chemistry unit outside and built snow volcanoes. Each volcano was given a different amount of vinegar to observe the differing outcomes," she says.

[See more photos ...](#)

Fun with science!

# NEWS & NOTES Continued ...

### Nice touch!

The Eagle spirit soars once more on the Town of Evans police car assigned to the School Resource Officer. For some reason, the Lake Shore Eagle decal was not used on the previous vehicle ... but it's back! SRO Shauna McCarthy poses with the vehicle and our Eagle mascot.
