

Lake Shore Central Schools Kindergarten Standards Checklist

MODULE 1 – 43 days - (September, October, November)

Counting and Cardinality, Operations and Algebraic Thinking, Measurement and Data

Standard	Written Standard	Done
*K.CC.3	Write numbers from 0 to 20. Represent a number of objects with a written numeral 0-20 (with 0 representing a count of no objects).	
*K.CC.4a	Understand the relationship between numbers and quantities; connect counting to cardinality. a. When counting objects, say the number names in the standard order, pairing each object with one and only one number name and each number name with one and only one object.	
*K.CC.4b	Understand the relationship between numbers and quantities; connect counting to cardinality. b. Understand that the last number name said tells the number of objects counted. The number of objects is the same regardless of their arrangement or the order in which they were counted.	
*K.CC.4c	Understand the relationship between numbers and quantities; connect counting to cardinality. c. Understand that each successive number name refers to a quantity that is one larger.	
*K.CC.5	Count to answer “how many?” questions about as many as 20 things arranged in a line, a rectangular array, or a circle, or as many as 10 things in a scattered configuration; given a number from 1–20, count out that many objects.	
*K.OA.3	Decompose numbers less than or equal to 10 into pairs in more than one way, e.g., by using objects or drawings, and record each decomposition by a drawing or equation (e.g., $5 = 2 + 3$ and $5 = 4 + 1$).	
K.MD.3	Classify objects into given categories; count the numbers of objects in each category and sort the categories by count. *Limit category counts to be less than or equal to 10.	

MODULE 2 – 12 days - (November)

Measurement and Data, Geometry

Standard	Written Standard	Done
K.MD.3	Classify objects into given categories; count the numbers of objects in each category and sort the categories by count. *Limit category counts to be less than or equal to 10.	
K.G.1	Describe objects in the environment using names of shapes, and describe the relative positions of these objects using terms such as <i>above</i> , <i>below</i> , <i>beside</i> , <i>in front of</i> , <i>behind</i> , and <i>next to</i> .	
K.G.2	Correctly name shapes regardless of their orientations or overall size.	
K.G.3	Identify shapes as two-dimensional (lying in a plane, “flat”) or three-dimensional (“solid”).	
K.G.4	Analyze and compare two- and three-dimensional shapes, in different sizes and orientations, using informal language to describe their similarities, differences, parts (e.g., number of sides and vertices/“corners”) and other attributes (e.g., having sides of equal length).	

MODULE 3 – 38 days- (December, January, February)**Counting and Cardinality, Measurement and Data**

Standard	Written Standard	Done
*K.CC.6	Identify whether the number of objects in one group is greater than, less than, or equal to the number of objects in another group, e.g., by using matching and counting strategies. Include groups with up to ten objects.	
*K.CC.7	Compare two numbers between 1 and 10 presented as written numerals.	
K.MD.1	Describe measurable attributes of objects, such as length or weight. Describe several measurable attributes of a single object.	
K.MD.2	Directly compare two objects with a measurable attribute in common, to see which object has “more of”/“less of” the attribute, and describe the difference. <i>For example, directly compare the heights of two children and describe one child as taller/shorter.</i>	

MODULE 4 – 47 days - (February, March, April, May)**Operations and Algebraic Thinking**

Standard	Written Standard	Done
*K.OA.1	Represent addition and subtraction with objects, fingers, mental images, drawings, sounds (e.g., claps), acting out situations, verbal explanations, expressions, or equations.	
*K.OA.2	Solve addition and subtraction word problems, and add and subtract within 10, e.g., by using objects or drawings to represent the problem.	
*K.OA.3	Decompose numbers less than or equal to 10 into pairs in more than one way, e.g., by using objects or drawings, and record each decomposition by a drawing or equation (e.g., $5 = 2 + 3$ and $5 = 4 + 1$).	
*K.OA.4	For any number from 1 to 9, find the number that makes 10 when added to the given number, e.g., by using objects or drawings, and record the answer with a drawing or equation.	
*K.OA.5	Fluently add and subtract within 5.	

* Major Emphases Standard

+ Pre-Post May-June Standard

MODULE 5 – 30 days – (May, June)**Counting and Cardinality, Number and Operations in Base Ten**

Standard	Written Standard	Done
*K.CC.1	Count to 100 by ones and by tens.	
*K.CC.2	Count forward beginning from a given number within the known sequence (instead of having to begin at 1).	
*K.CC.3	Write numbers from 0 to 20. Represent a number of objects with a written numeral 0-20 (with 0 representing a count of no objects).	
*K.CC.4a	Understand the relationship between numbers and quantities; connect counting to cardinality. a. When counting objects, say the number names in the standard order, pairing each object with one and only one number name and each number name with one and only one object.	
*K.CC.4b	Understand the relationship between numbers and quantities; connect counting to cardinality. b. Understand that the last number name said tells the number of objects counted. The number of objects is the same regardless of their arrangement or the order in which they were counted.	
*K.CC.4c	Understand the relationship between numbers and quantities; connect counting to cardinality. c. Understand that each successive number name refers to a quantity that is one larger.	
*K.CC.5	Count to answer “how many?” questions about as many as 20 things arranged in a line, a rectangular array, or a circle, or as many as 10 things in a scattered configuration; given a number from 1–20, count out that many objects.	
*K.NBT.1	Compose and decompose numbers from 11 to 19 into ten ones and some further ones, e.g., by using objects or drawings, and record each composition or decomposition by a drawing or equation (such as $18 = 10 + 8$); understand that these numbers are composed of ten ones and one, two, three, four, five, six, seven, eight, or nine ones.	

MODULE 6 - 10 days – (June)**Counting and Cardinality, Geometry**

Standard	Written Standard	Done
*K.CC.4d	<i>Develop understanding of ordinal numbers (first through tenth) to describe the relative position and magnitude of whole numbers.</i>	
K.G.4	Analyze and compare two- and three-dimensional shapes, in different sizes and orientations, using informal language to describe their similarities, differences, parts (e.g., number of sides and vertices/“corners”) and other attributes (e.g., having sides of equal length).	
K.G.5	Model shapes in the world by building shapes from components (e.g., sticks and clay balls) and drawing shapes.	
K.G.6	Compose simple shapes to form larger shapes. <i>For example, “Can you join these two triangles with full sides touching to make a rectangle?”</i>	

* Major Emphases Standard

+ Pre-Post May-June Standard
