

Phase 2 of the Capital Construction Project Underway at Middle School

OUTSIDE: The front entrance of the Middle School is fenced off and closed for construction. Signs are up for the temporary main entrance to the Middle School, near the sculpture garden.

INSIDE: Caution tape cordons off access to the front entrance area that is under construction. When work is completed, the Middle School will have a secure entry area.

The former Main Office area is vacant and cleared out in preparation for construction work at the front of the building.

The temporary main office and the temporary health office are to your left as you enter the temporary main entrance off the sculpture garden.

Phase 2 of the Capital Construction Project Begins at High School in February
